Who We Are?

PT Savisi Jaya Solusi was established in 2019 and is based in Bandung, West Java. The company operates in the field of automation as a System Integrator and an Authorized Distributor of NIDEC Servo Inverters, Janome Robot Presses, and SICK Instruments.

Savisi Jaya Solusi provides a full range of technical and project management expertise to assist clients in supplying automation parts, system design, troubleshooting, and comprehensive automation solutions across various industries, including automotive, food and beverage, pharmaceutical, petrochemical, etc.

Our Vision

To be a leading company providing automation solutions through excellent multidiscipline services.

Our Mission

- ▶ Increasing growth in both local and international markets.
- ▶ Improving satisfaction and maintaining good relationships with our business partners on a mutually beneficial basis.
- ▶ Offering comprehensive solutions that fully meet the requirements of our clients.

What We Do?

Industrial Automation Consultant, Design & Training

System Integrator

IoT & SCADA System

Authorized Distributor

Industrial Automation Equipment Supplier

Why Choose Us?

Responsive

“We understand your time is precious, we’ll response with everything you needs”

Availability

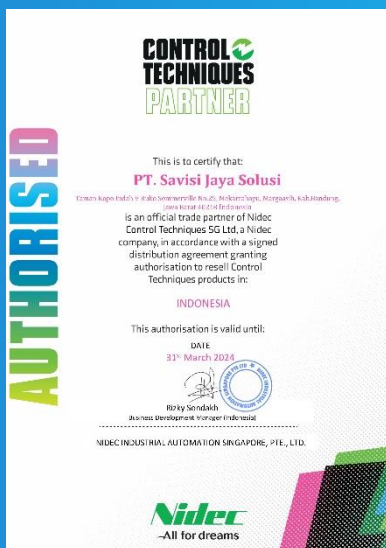

“Always ready for your needs”

Knowledge

“Our knowledge in Automation Industry can help you to solve issues”

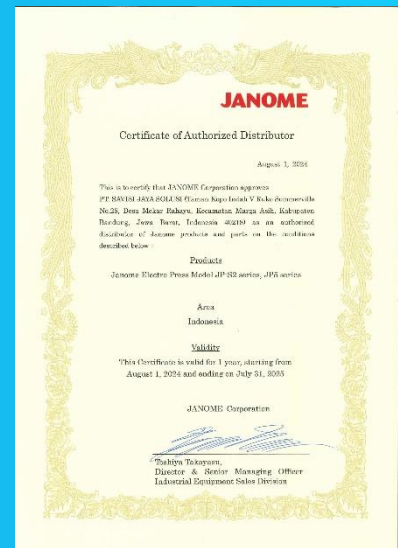

Authorized Distributor

NIDEC

SICK

JANOME

Our Product

Industrial Control Automation

- ▶ Smart Relay
- ▶ PLC
- ▶ HMI

Human Machine Interface

Sensor & Instrumentation

AC Motor Speed Control

- ▶ Inverter
- ▶ Speed Control Motor

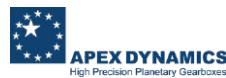

Servo Press

JANOME

Motion & Transmission

- ▶ Servo Motor
- ▶ Stepping Motor
- ▶ Motorized Actuator
- ▶ Linear Motor
- ▶ Transmission Component

IoT & SCADA Software

OpenAIoT
Automation & Internet of Things

SIEMENS

SCADA - AIOTKU

**“Automation, AI and IoT System Solutions,
We use Internet for everything.
Try and feel the difference”**

Industrial IoT Automation

IoT Data Center and Reporting

Industrial IoT QR-Code Gateway

IoT Monitor and Alert Systems

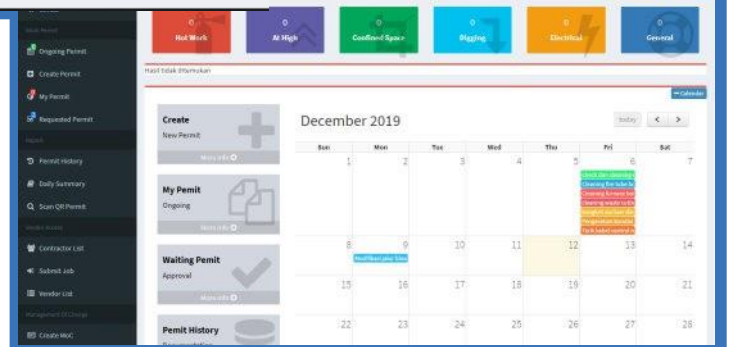

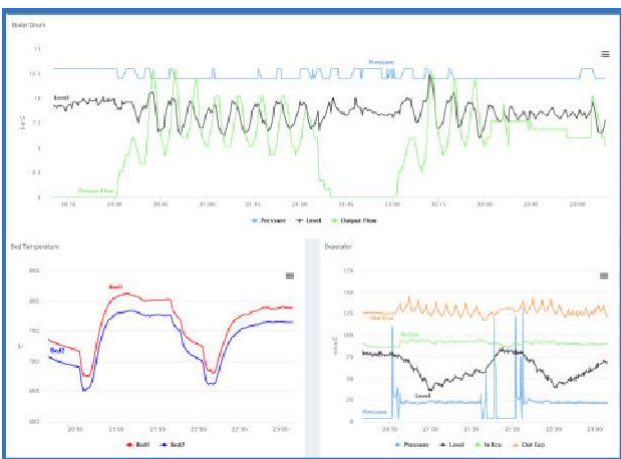

Automatic Social Media Chat-Bot

IoT Automatic Scheduler

OEE – Overall Equipment Effectiveness

HSE - Permit

Quality Control – Data Sampling

Our Services

Field Devices

- ▶ Installation
- ▶ Troubleshooting

Control System Training

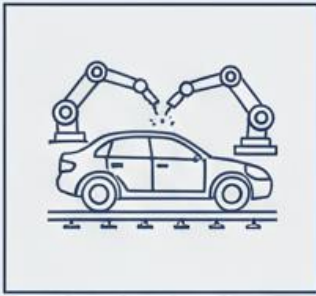

- ▶ Automation Control & Mechanical Design
- ▶ New Automation System Project
- ▶ System Retrofit Upgrade & Modification
- ▶ Multi brand interconnecting system
- ▶ Control Panel Assembly
- ▶ Loop Test System
- ▶ Programming
- ▶ Start up & Commissioning
- ▶ Maintenance Contract & After Sales Service
- ▶ Troubleshooting

Control System Training

- ▶ PLC Basic & Advanced Training
- ▶ HMI Training
- ▶ Inverter Training
- ▶ Servo Training
- ▶ SCADA & Networking Training

Automation Consulting Parts & Components

Portofolio

PT Sparta Guna Sentosa

CNC Lathe Focus

Replacement Axis X and Z Servo Motor from Delta ASD-B2 to Mitsubishi MR-JE use Syntec CNC Controller.

Induction Feeding

Integration system between Induction feeding machine use Universal Robot (UR10) with Siemens S7-1200 and Mitsubishi FX-3G under modbus (RS-485) Communication.

Microsa Grinding

Conventional System to Fully automated grinding for shaft workpiece with Mitsubishi PLC Q-series, Servo MR-J4, and Inverter FR-A800.

PT Wijaya Integrasi Wisdom

Whole Bend Quality Check Gantry

Bend Quality System using PLC FX-5U and HMI GS-2107 Mitsubishi

Utility Management System

Monitor, manage, and optimize the consumption and distribution of utilities, such as electricity, water, gas, and other essential resources.

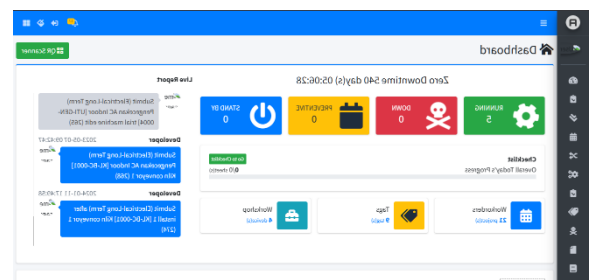

Key features: Resource Efficiency, Real-Time Monitoring, Automation, Data Analytics, Sustainability.

CMMS+

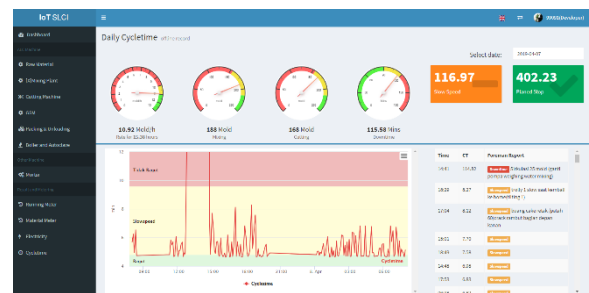

Enhanced version of a traditional CMMS that integrates chatbot notification features to improve real-time communication, maintenance efficiency, and user engagement.

Key features: Chatbot, Asset Management, Work Order Management, Preventive Maintenance, Inventory Management, Reporting & Analytics

Integrated ERP

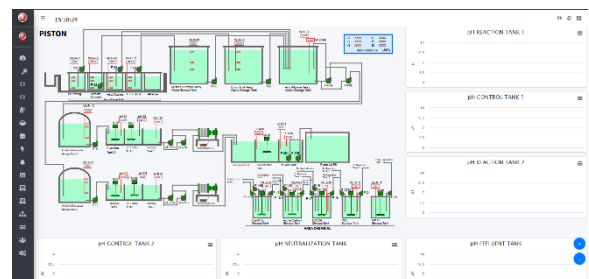

System that covers the complete lifecycle from raw data collection to the sale of finished goods (FG) is essential for modern manufacturing and production companies. This system streamlines operations, optimizes resources, and ensures data consistency across all departments.

Water Waste Treatment

An integrated solution designed to bridge PLC-based industrial automation systems with modern web-based interfaces. This system allows real-time monitoring and control of industrial processes via any device with a web browser.

Key features: Real-Time, Centralized Control, Secure Connectivity, Protocol Versatility
